

OMNIINTELOS S.A.

Employee Handbook

Edition 2026.1 - All entities

Version	2026.1
Effective	2026-01-15
Scope	Niger, Mali, Burkina Faso, Tchad, Senegal, France, USA
Owner	People & Culture
Review cycle	Annual

OmniiIntelOS S.A. is a fictional company. This document is generated for IntelAI demonstration and evaluation purposes.

1. Welcome to OmniIntelOS

Our mission is to make applied artificial intelligence accessible to African organisations, with teams based in Africa and international engineering standards.

This handbook applies across all group entities. Where it conflicts with local labour law, local law prevails.

2. Working languages

French and English are both official. Any documentation intended for the whole group is published in both. Sahel regional meetings are held in French; architecture reviews and product councils are held in English.

3. Ways of working

Hybrid model: three days per week on site for delivery teams, full flexibility for shared functions.

On-call applies to Cloud & Data Centre Operations and Security teams and is compensated per the schedule in Annex B.

Standard 40-hour week. Overtime is approved in advance by the line manager.

4. Compensation and benefits

Salary bands are reviewed annually against regional market surveys, targeting under 5% spread between equivalent profiles.

Health cover for the employee and direct dependants, 80% employer-funded.

Equity participation plan open to all employees after 12 months of service.

5. Information security

Multi-factor authentication is mandatory on ALL environments, production and non-production alike. This rule comes directly from incident INC-2023-0214.

No customer data may be copied into a non-production environment. An automated scanner verifies this daily.

All access is revoked no later than the last working day, for employees and contractors alike.

6. Conduct and ethics

Zero tolerance for harassment, discrimination and bribery. An anonymous reporting channel is available and administered by an independent third party.

Gifts and hospitality above XOF 50,000 must be declared.

7. Leave

30 working days of paid leave per year, plus the local public holidays of the employing entity.

Maternity leave: 14 weeks minimum; second-parent leave: 4 weeks, fully paid.

8. Professional development

Annual training budget per employee, prioritising cloud, security and data science certifications.

University partnerships (Universite Abdou Moumouni, UCAD) hosting internships and applied theses.

9. Recruitment and onboarding

Every open role uses a structured scorecard, identical across candidates, to limit interview bias.

Onboarding runs 90 days with a named buddy, a ramp plan, and formal checkpoints at 30, 60 and 90 days.

Onboarding capacity is capped: simultaneous hires may not exceed available mentoring capacity. This rule comes directly from the 2022 growing-pains period.

10. Performance management

Half-yearly cycle with written objectives, self-assessment, manager assessment and group calibration.

Increases and promotions are decided in calibration, never unilaterally by a single manager.

11. Mobility and travel

Travel between Sahel entities requires prior security clearance, reviewed monthly against the regional situation.

International travel is batched where possible to limit Scope 3 emissions.

12. Equipment and access

Each employee receives a fleet-managed laptop with full-disk encryption, automatic lock and remote wipe.

Use of personal devices to access data classified Restricted is prohibited.

13. Health, safety and wellbeing

Continuity plan for exposed sites, half-yearly evacuation drills, and an assistance scheme for regional incidents.

Employer-funded confidential counselling, available to the employee and immediate family.

14. Leaving the company

Notice per local law. A structured exit interview is held in every case, with recurring themes reported quarterly to the executive committee.

All access revoked no later than the last working day, without exception.

Annex A - Departments

- Engineering
- Data Science & AI Research
- Cloud & Data Centre Operations
- Professional Services
- Sales & Partnerships
- Customer Success

- Finance & Administration
- People & Culture
- Security & Compliance

Annex B - On-call schedule

Tier	Response target	Compensation
