Message du Directeur General

Discipline des coûts, révision tarifaire et automatisation de la livraison redressent la marge brute et repassent la règle des 40 au-dessus de la cible.

Les perturbations frontalières et des corridors régionaux retardent les GPU et le matériel réseau importés ; la ponctualité des livraisons et la qualité fournisseur se dégradent pendant l'ouverture des bureaux de Bamako et N'Djamena.

L'intelligence documentaire bilingue FR/EN et la capacité GPU souveraine rencontrent une forte demande régionale en IA ; les revenus d'expansion portent le NRR bien au-dessus de la cible.

Sur l'exercice, le chiffre d'affaires consolide s'établit à USD 24.93M, pour une marge brute de 68.6% et un EBITDA de USD 2.48M. L'ARR de sortie atteint USD 23.03M auprès de 273 clients actifs, avec un effectif de 334 collaborateurs. L'indice de sante d'entreprise en fin d'exercice ressort à 88.9/100 (Strong).

Facteurs de risque

- Concentration geographique au Sahel : instabilite politique et fermetures de corridors peuvent retarder le materiel importe et la mobilite des equipes.
- Dependance energetique : la fiabilite du reseau conditionne les couts de groupes electrogenes et les emissions de Scope 1.
- Risque de change : les revenus sont libelles en USD et EUR, les charges majoritairement en XOF (parite fixe EUR a 655,957).
- Cybersecurite : l'incident de fevrier 2023 a demontre l'impact en cascade d'une intrusion sur la retention client et la tresorerie.
- Penurie de competences : la concurrence regionale et internationale sur les profils IA maintient une pression sur la remuneration et l'attrition.

Perspectives

Le solaire couplé au stockage porte la part renouvelable du DC1 au-delà de la cible ; les audits ISO 27001 et ISO 14001 sont validés et les indicateurs de gouvernance atteignent les objectifs du conseil.
