Risk factors

- Sahel geographic concentration: political instability and corridor closures can delay imported hardware and team mobility.
- Energy dependence: grid reliability drives generator costs and Scope 1 emissions.
- Currency risk: revenue is denominated in USD and EUR while costs are mostly XOF (fixed EUR peg at 655.957).
- Cybersecurity: the February 2023 incident demonstrated how an intrusion cascades into customer retention and cash.
- Talent scarcity: regional and international competition for AI skills keeps pressure on compensation and attrition.

Outlook

Headcount outruns onboarding capacity: attrition spikes, eNPS collapses, delivery slips and first-pass quality degrades.
