## Letter from the Chief Executive

A USD 12M Series A funds aggressive hiring and the Niamey DC1 land acquisition; growth is bought at the cost of near-term margin.

Headcount outruns onboarding capacity: attrition spikes, eNPS collapses, delivery slips and first-pass quality degrades.

Consolidated revenue for the year was USD 6.43M, at a 54.2% gross margin and USD -434.5k of EBITDA. Exit ARR reached USD 5.78M across 103 active customers, with 90 employees. The enterprise health index closed the year at 67.2/100 (Stable).

## Risk factors

- Sahel geographic concentration: political instability and corridor closures can delay imported hardware and team mobility.
- Energy dependence: grid reliability drives generator costs and Scope 1 emissions.
- Currency risk: revenue is denominated in USD and EUR while costs are mostly XOF (fixed EUR peg at 655.957).
- Cybersecurity: the February 2023 incident demonstrated how an intrusion cascades into customer retention and cash.
- Talent scarcity: regional and international competition for AI skills keeps pressure on compensation and attrition.
