Letter from the Chief Executive

A credential-stuffing intrusion (13-14 Feb 2023) reaches a staging estate holding customer telemetry. Containment forces multi-day degradation; the churn and revenue consequences land over the next two quarters.

Zero-trust rebuild, ISO 27001 programme, independent penetration testing and a customer-trust campaign; costs stay elevated while confidence returns.

Consolidated revenue for the year was USD 8.39M, at a 53.3% gross margin and USD -149.3k of EBITDA. Exit ARR reached USD 7.15M across 119 active customers, with 142 employees. The enterprise health index closed the year at 68.4/100 (Stable).

------------------------	--------------

Risk factors

- Sahel geographic concentration: political instability and corridor closures can delay imported hardware and team mobility.
- Energy dependence: grid reliability drives generator costs and Scope 1 emissions.
- Currency risk: revenue is denominated in USD and EUR while costs are mostly XOF (fixed EUR peg at 655.957).
- Cybersecurity: the February 2023 incident demonstrated how an intrusion cascades into customer retention and cash.
- Talent scarcity: regional and international competition for AI skills keeps pressure on compensation and attrition.

Notes to the financial statements

1. Basis of preparation

Statutory books are kept in XOF under the OHADA framework (revised SYSCOHADA). The presentation above is translated to USD at the internal planning rate; the EUR/XOF parity is fixed at 655.957 by the BCEAO.

2. Revenue recognition

Subscriptions are recognised rateably over the contract term. Professional services are recognised on a percentage-of-completion basis. Hosting revenue is recognised over the occupancy period.

3. Property, plant and equipment

The DC1 facility is depreciated over 15 years for civil works and 5 years for IT equipment. GPU accelerators are depreciated over 4 years.

4. Taxation

Niger corporate income tax at 30%. No deferred tax asset is recognised on carried-forward losses until recovery is probable.

5. Commitments

Equipment facility secured on DC1 hardware, amortising over 60 months. Capacity commitments with three transit carriers.

6. Subsequent events

No material events after the reporting date are reported.

Outlook

Tier-III data centre commissioning: heavy CAPEX and imported hardware lift leverage and squeeze runway, but unlock sovereign-hosting revenue.
